

AI's already in our lives, do we get on it enough? are we critical to these tools? they are obviously helpful but do we think of the carbon print we leave each time when we use AI or big data or machine learning tools? where is the servers? how are they sourcing the energy, labour???

Pen and paper will always work offgrid. AI won't.

AI is sometimes invisible, but it is here!

AI & MUSIC? I don't care about the fact that AI will replace musician.

AI & MUSIC? I care about My only worry about AI is that people would start to believe that this tools are inevitable technology. they aren't.

Hit Music for Djs! But only 10% of people will enjoy it like the Djs! Music is expression, it has always been and people/Humans will do amazing things. Djs have loved music and when left to their own devices will do amazing things.

GenAI will suit boring people but 90% of people like them. Playlists are dull music and makes a playlist of popular music to recreate want to hear by using it builds what it thinks people Ai understands music as maths

GenAI a big demonstration in Alexander Platz to fight for human rights

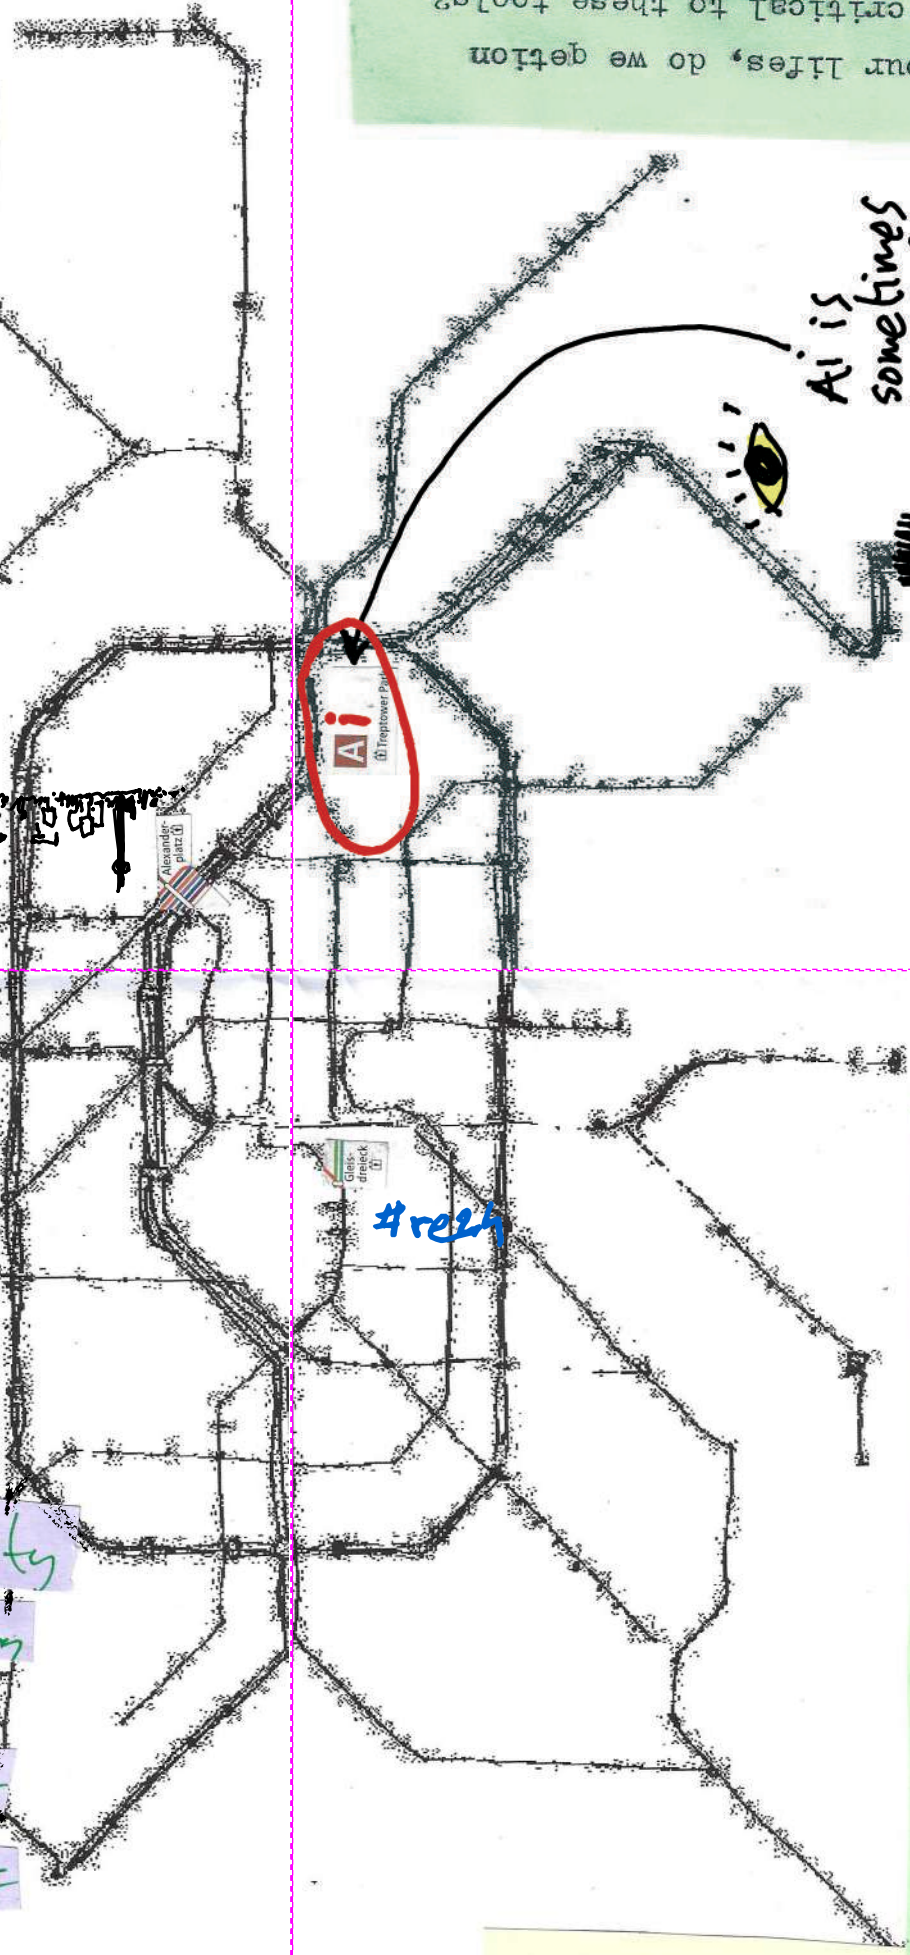

Who is working behind Ai?

Together Ai & Human creativity could create even more amazing things which are inspirational. There is the possibility together to create whole new genres of music and Djs mixers which stretch way beyond human experience

with decks only together can it work

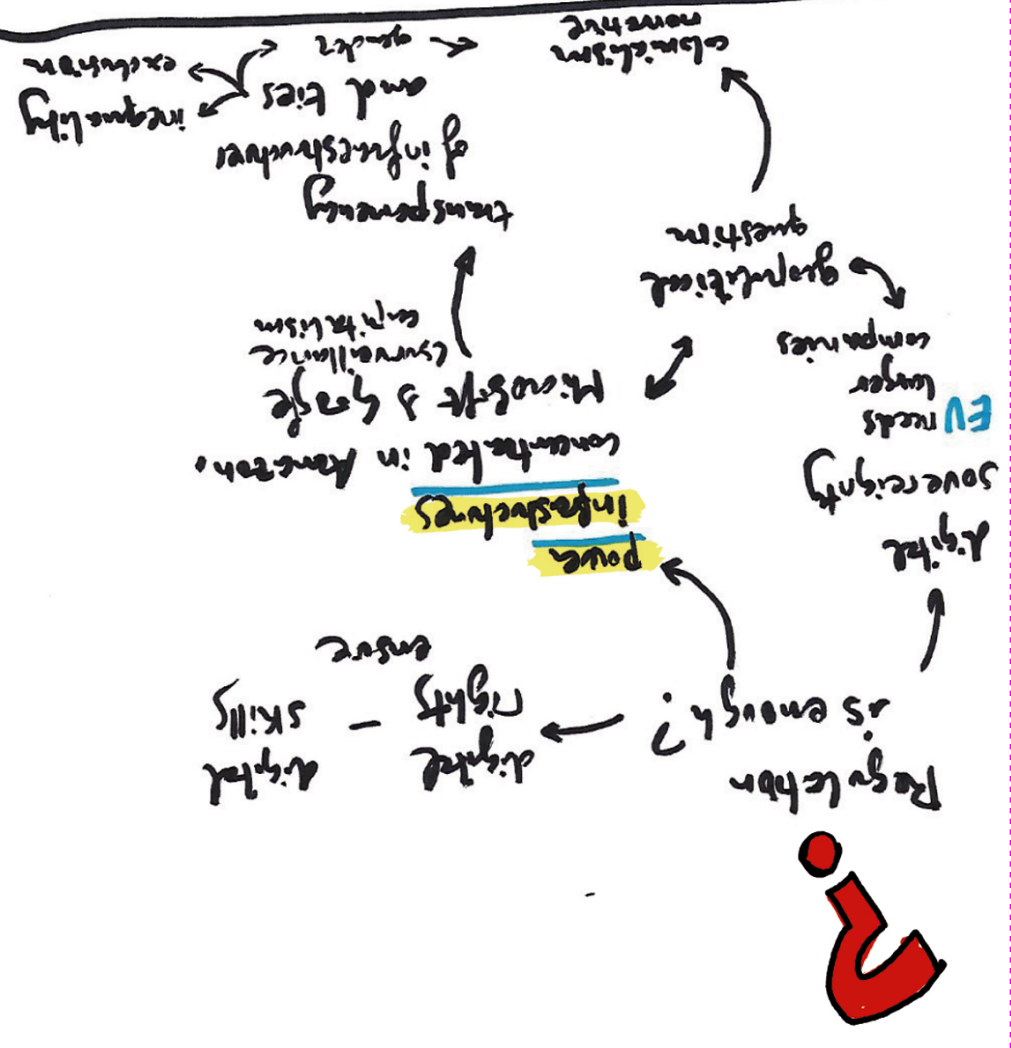

Who Cares Re:publica is caring!

Big ideas
reels

Ensure the solution is NOT going to be provided for those who caused the problem

NO MORE DATA CENTERS

Demonstrators against the world's data centers around the globe

The question is who should have the control/power and society or large companies?

Spreading 2-3% by year

Energy is also spreading while thought is of Microsoft.

This happens while thought is in ex of Google and 34% in ex year

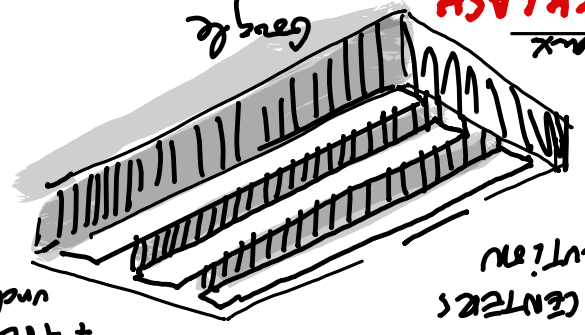

The average of water use increases 20% each year

DATA CENTER BOOM

Water consumption in 5 years

AI-RUSH

Data centers have increased x3

DATA CENTERS Evolution

2018	439
2020	597
2023	926

+40% water consumption

@meiNFEEENSTAU
@average.pony

Let's write a song with AI

KLIPPSCHLIEFER
SCREAMS;
DIGITAL DREAMS

DOWN BY THE SAVANNAH
WHERE THE KLIPPSCHLIEFER ROAMS,
THROUGH THE ROLLING HILLS
THEY MAKE THEIR HOMES,
AT THE RE:PUBLICA
WE'RE TALKING TECH AND DREAMS,
BUT MY MIND'S WANDERING TO ROCKY STREAMS

Prompt:
Schreibe einen Songtext im Country Song-Stil über die Themen Klippschliefer, re:publica, Snacks und Karate. Schreibe mindestens eine Strophe und einen Refrain.

FÜR IMMER COOL!

WITH A BAG OF SNACKS
& A HEART FULL OF CHEER
KARATE MOVES AND A COLD ROOT BEER
WE'RE LIVING LIFE JUST LIKE WE PLEASE
WITH THE KLIPPSCHLIEFER
AND THE RE:PUBLICA BREEZE

Mit Herz und Schnauze

From the city lights to the open plain
we gather round, share our homes and pain
discussing futures while we munch on treats
in the digital age on wooden seats

THAT'S AMORE!

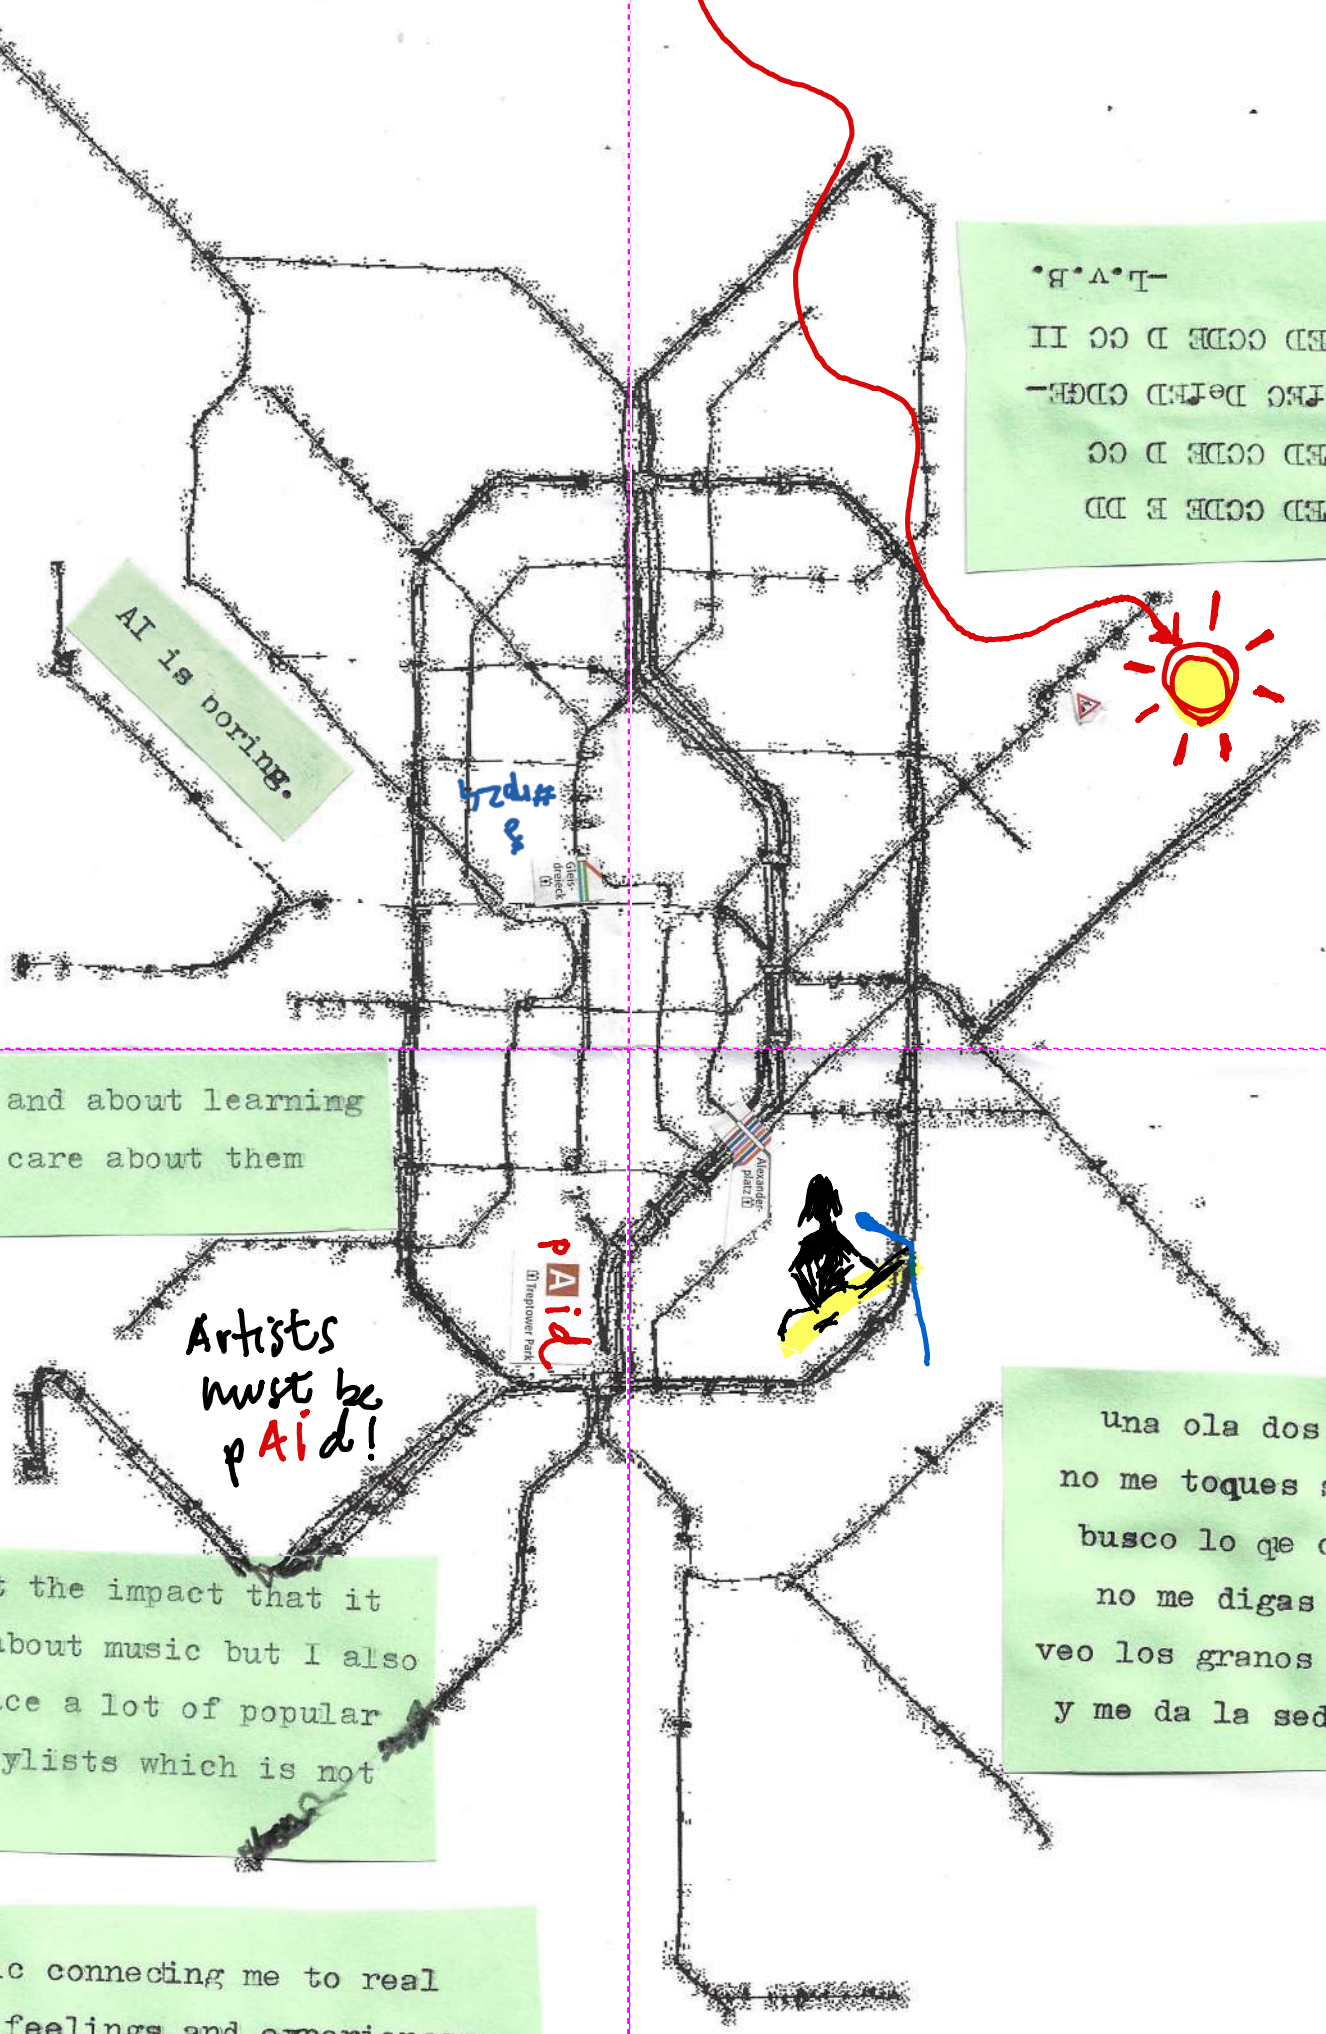

from the individual
to the collective
action!

I hear when I sing using AI
songs und 3 sumene lider singen oder
tanzen. - - - - -

I hear when I sing using AI
songs und 3 sumene lider singen oder

I don't care about
because AI can't make sense of humans
experience.
AI doesn't have any sense(s).

We are the powerfull forces in society.

AI is boring.

I care about discovery and about learning
new artists but i also care about them
getting paid.

Artists
must be
pAid!

una ola dos olas tres olas
no me toques si no molas
busco lo que choca
no me digas loca
veo los granos de sal en tu boca
y me da la sed de caída

AI & MUSIC? I care about the impact that it
have... as a dj I care about music but I also
understand AI will replace a lot of popular
music with generated playlists which is not
a bad thing.

I care about music connecting me to real
people and their feelings and experiences
that they express with their music

I think AI and music are a great couple.
They make a great starting point from which
the human can develop further compositions.
thats it.

AI and music are wild combined with textuality
Useful output ALREADY new. I worried about
the future of musicians and about who will
own the intellectual property.

Is she?
I lost my heart
Under the bridge
to that little girl
so much to me
